

# **Sprint 5 Retrospective 27.04.2018 - 04.05.2018**

## **What did we learn?**

1. Technical and technological aspect
  - (a) Vera ++
  - (b) Every car is different and unique in their own way, for example Group 07 does not turn as sharp as us
2. Process issues
  - (a) After the presentation on W17, we took a break to celebrate being done with following and celebrating the May 1st holiday, this caused a short sprint, so not much got done
  - (b) Inter team collaboration when testing platooning, Group 07 couldnt show up at good/comfortable times for us, which caused staying in school for long hours
3. Documentation related matters
  - (a) Planning the report and work division
  - (b) Everyone's learning LaTeX basics for the report

## **What worked well during this sprint?**

1. Scrum master made a big improvement from the past sprints
2. Communication amongst team members is good
3. good work ethic = everyone does work

## **What went wrong/poorly this sprint?**

1. Needed a more controlled dry run, with Group 07 to test the scenario, to avoid lots of reruns during demo

## **What can be improved during the next sprint?**

1. More standups

**Was this sprint affected by unavailability of any members?**

Yes, all members were not as active due to the holiday, short sprint. The group we were helping test following could only show up in late afternoon, at which point some of our team members were not able to be present.
